

Standup Meeting Notes

Name: notes for the standup

Standup 1 — Mar 6

- Planned design of page where applicant fills out form for a grant
- Planned design of grantee dashboard and application history page
- Discussed story point allocation (planning poker)
- Discussed user story/responsibility assignments

Standup 2 — Mar 7

- Improved the confirm page for posting grants and expanded the grant form profile field to specify more details to filter applicants
- Designed the grantee response review section
- Discussed new request structure for grant creation
- Created answer data model for each question

Standup 1 — Mar 8

- Developing the grantee dashboard page
- Continued developing applicant application page
- Began design of the 'My Grants' page for grantors to view their grants
- Began creating backend file storage system

Standup 4 — Mar 11

- Finished the grantee dashboard page
- Started to develop the application history page
- Improved accessibility of form builder page
- Discussed a refactor of sending files attached to the form from the frontend to the backend as multipart instead of
- Added data models for grant application
- Implemented create grant application endpoint

Standup 5 — March 12

- Finished the application history page
- Started to develop the submission history section
- Made style changes to application page and applicants can now upload file to the form
- Changed grant posting to better accommodate file transfer
- Discussed backend strategy for adapting data models to new grant request structure

Standup 6 — March 13

- Finished the submission history section
- Started to work on the browse grants page
- Began working on the view grant list and applicant list for each grant
- Finished work on backend file storage (allowing for uploads and deletes of any file type)
- Refactored backend tests to use the new request structure
- Added routes for reading all applications for a grantee and reading all applications for a grant

Standup 7 — March 14

- Developing the browse grants page
- Continued development on the view application page
- Refactored most of the existing routes to use the new request structure (grant routes other than create, all existing application routes)
- Implemented delete application route
- Updated tests to clean up any data inserted during the tests
- Implement refactor for grant data model and grant endpoints
- Grant list view and application list pages implemented

Standup 8 — March 15

- Finished the browse grants page
- Refactored the update application route
- Completed the sprint retrospective with the team
- Finished design for create/updateGrant routes and integration between frontend and backend for grant creation
- Added some simple frontend checks to form answers to quickly notify applicant of issues in their answers
