

	User Stories	Story Points	Assigned member(s)			
			Frontend	Frontend Task Description	Backend	Backend Task Description
<b>Accessibility</b>	As a grantor or applicant, I want to be able to change the contrast so I can accommodate my vision impairment	2	Alykhan	Implement monochrome functionality for colour blind users	N/A	
	As a grantor or applicant with protanopia, deuteranopia or tritanopia (types of colour blindness), I want an option to accommodate for my vision impairment	10	Carter	Carter - Implement 3 different modes, each with a specific colour pallet to the site to accommodate for the most common types of colour blindness	N/A	
	As a grantor or applicant, I want to be able to use screen readers so that I can navigate and use the website effectively	10	Carter Auric	Auric - Make the form editor's drag-and-drop work with screen readers with ReactDnD's announcements, and use aria-labels to make selecting answers more clear on the apply page and make building forms more clear on the editor page  Carter - Make every single other page work with screen readers, home page, all signup/login pages, all grantor pages, all grantee pages.	N/A	
<b>Grant Creator</b>	As a grantor I want to be able to create a new blank grant application form so I can begin making the form	2		Improve and optimize file upload process	Aahil, Ben	<b>Aahil/Ben:</b> Update and refactor data models to add more thorough validation and accomodate new grant request structure <b>Ben:</b> Routes need lots of debugging to ensure that all data is stored properly and will not cause errors when fetched by frontend
<b>Grantee Dashboard</b>	(Improve from sprint 2) As an applicant, I want to be able to browse grants pertaining to me so that I can easily find new grants to apply to	6	Austin Alykhan	Alykhan - Implement filter storing based on inputs and integrate it with the backend to filter which grants an applicant wants to view, use this data to fill out elements on the frontend	Aahil	<b>Aahil:</b> Implement filters to search for grants based on profile requirements (e.g. age, nationality) + corresponding testing.
	(Improve from sprint 2) As an applicant I want to view all the grants I have applied to so that I can see my pending applications	6	Austin Alykhan	Alykhan - Integrate Austin's pages once made to receive data from the backend and fill out components showing grantees all their applications and to which grants they have applied to	Ali, Aahil	<b>Ali:</b> Refactor route for getting applications by grantee so that the grant questions are also returned <b>Aahil:</b> Implement filters to search for applied grants (e.g. submitted date,
<b>Grantor Dashboard</b>	(Improve from sprint 2) As a grantor, I want to be able to close/reopen the application process to new applicants so that I can enforce submission deadlines or have time to review all existing applications	3	Carter	Carter - Implement an 'Awarded' status that closes the grant when the maximum number of applicants have been selected	Ben	<b>Ben:</b> Added new routes to change application status and change
	(Improve from sprint 2) As a grantor, I want to be able to choose an applicant(s) to receive a grant so I can move to the next stage in providing the grant.	6	Carter	Carter - Add more application decision making. Pending applications are either rejected or accepted but accepted applications should be able to be revoked and rejected applications should be able to be accepted	Ali	<b>Ali:</b> Add route for choosing an application as a "winner", reflecting the changes in both the application and the grant document stored
<b>Milestones</b>	The milestone user stories were substituted with further improvements to current site features and accessibility on the frontend and route debugging/editing on the backend	N/A	N/A	N/A	N/A	N/A
