Grantee Dashboard	As an applicant, I want to be able to browse grants pertaining to me so that I can easily find new grants to apply to	6	Austin/Alykhan	**Austin**: Design and develop the dashboard for grantee after they login **Austin**: Design and develop the browse grants page for grantee **Alykhan**: Implement integration for route to create new application from grant form	Ali/Aahil	**Aahil:** Implement route for creating a new application from a grant form, verifying whether the corresponding grant exists when needed **Aahil:** Complete design and data model implementations for Grant and Application **Ali:** Implement read, update, and delete routes for applications **Ali:** Add routes for getting all applications by a grantee
	As an applicant I want to view all the grants I have applied to so that I can see my pending applications	6	Austin/Alykhan	**Austin**: Deisgn and develop the application history page for grantee **Alykhan**: Implement integration for getting all applications based on a grantee	Ali/Aahil	
	As an applicant I want to view my application to grants so I can review my responses before and after submission	6	Austin/Alykhan	**Austin**: Deisgn and develop the review my response sections after submission **Alykhan**: Implement integration for read, updated and delete routes for applications	Ali/Aahil	
Application Process	As an applicant, I want to be able to upload documents directly to the grant form such as a resume or cover letters so that I can bundle the application process into one clear and inclusive submission	9	Auric	Have a way for users to choose files on their computer to upload	Ben	**Ben**: Create a backend a file system that is capable of storing all file types uploaded by the grant applicant and the grantor. File uploads and deletions can come from grant creations, grant updates, grant deletes, application creations, application updates, and application deletes. Thus, all those requests must be updated in the backend to work with the file storage system. **Ben**: Store files in a separate DB from the users and grants in order to separate responsibility and allow for easier searches.
	As an applicant, I want to be able to withdraw my submitted application without consequence at any time so that I can go back if I no longer wish to apply	1	Auric	Have a quit button	Ben	**Ben**: Update route to delete grant applications. Integrate file deletion with application deletions, ensure all associated files are deleted alongside the applicaiton.
	As an applicant, I want to fill out grant application forms for grants that I wish to apply to so that I can be chosen to receive the grant	2	Auric	Have a page for each grant where applicants will go to fill out form questions. The answer will depend on the type of question.	Ben	**Ben**: Update route to upload grant applications. Integrate file upload with application upload, ensure all associated files are upload and saved alongside the application. The files must be linked to the application whenever the application data is requested.
Grantor Dashboard	As a grantor, I want to see a list of my grants so I can quickly see the statuses of all active grants	3	Carter	**Carter:** Design a list-type page to view all active and closed grants	Ali/Aahil	**Ali:** Add endpoint for getting all applications by grant **Aahil:** Add thorough validation to answer data models to ensure they conform to question constraints specified by grantor when creating a grant form **Ali:** Implement backend tests for creating applications
	As a grantor, I want to have a button for each unawarded grant that shows the number of applications and takes me to a list of applications to review so I can quickly find applications to review	4	Carter	**Carter:** Add a button on each grant to view the current applications to each grant **Carter:** Design and develop a page to view all applications to each grant	Ali/Aahil	
	As a grantor, I want to be able to close/reopen the application process to new applicants so that I can enforce submission deadlines or have time to review all existing applications	3	Carter	**Carter:** Add a button to change grant status and update it on the backend	Ali/Aahil	
	As a grantor, I want to be able to choose an applicant(s) to receive a grant so I can move to the next stage in providing the grant.	6	Carter	**Carter:** Design a page to view specific applications and select them as a winner for the grant	Ali/Aahil
